

Sweeping Revision Of Statutes Effected By The Governing Board

"Senate" to Take Place of Corporation of University — Department of Extra Mural Relation Abolished — Board of Governors Make Announcement at Meeting Yesterday — Dr. Eve's Retirement Released

DRASTIC changes in the statutes of the University, announcement of Dean Eve's retirement, and the abolition of the Department of Extra Mural Relations were the outcome of yesterday's meeting of the Board of Governors held in the board room of the Canadian Pacific Railway, Windsor Street Station under the chairmanship of E. W. Beatty, K.C., Chancellor of the University.

The governors expressed themselves as being "conscious and appreciative of the distinguished and eminent services" which Dr. Eve has rendered the University. Dr. Eve will retire from his post at the end of the present academic year.

Col. Bovey Continues

The Department of Extra-Mural Relation will be abolished, the statement issued by the governors said. It is understood, however, that the duties of which the department has had charges will be continued by Colonel Wilfred Bovey, director of the department.

The most drastic change in the statutes is in the replacement of the Corporation by a new academic authority to be called the "Senate" which, it is understood, will have very wide powers although its membership is limited to 26 instead of 76. The Corporation which will cease to exist, has been the central authority of McGill for 83 years.

Vice Principal To Macdonald

The administration of Macdonald College, Ste. Anne de Bellevue, has also been subject to revision by which the dean of the faculty of agriculture becomes vice-principal. Its head officer is still the principal of McGill, but in practice, Dr. W. H. Brittain, the present dean of agriculture will be the head of Macdonald.

The new Senate, which will have control of all the academic and undergraduate activities, presents two new features, in that it will have no members from outside the University, and that its membership will be limited to 26. Members will be known as Fellows of McGill University. The Senate will watch the general policy of the University and exercise control of admission. It is also stipulated that it is the duty of this body "to fix the university calendar, including the dates of university function, holidays or general suspension of lectures."

Gifts Acknowledged

After several announcements of statutory changes had been made, the board acknowledged officially the gifts made to the University in the past year. The most outstanding of these were: \$3,000 from the American Otolaryngological Society to the Faculty of Medicine for a special study of the problems of hearing; from Mrs. J. R. Fraser, \$1,200 for the Clara Law Fellowship in Obstetrics and Gynaecology for the current year.

German Department Repeats Production

To Stage Kotzebue's Comedy in Moyses Hall Feb. 7th.

The German Department has announced that they plan to repeat their performance of the German Comedy "Die Deutschen Kleinstädter." This is to be staged at Moyses Hall Thursday, February 7th at 8:30 p.m.

The play consists of four acts and although the dialogue is in German, the plot is simple so that those who have no understanding of German will find the action obvious and the play humorous.

All those interested are invited to attend without admittance fee. Students studying in German will be given an opportunity of viewing typical German life-scenes and of hearing the language correctly pronounced.

To Depict Native Art

Miss Van Stone Will Deliver Illustrated Address

Miss Anne Van Stone will discuss "Appreciation of Canadian Art" at the S.O.M. Open House to be held in Strathcona Hall this week. Miss Van Stone, a graduate of the University of Manitoba, has studied art in Toronto, London and the Continent, and has taught this subject for many years. The address will be illustrated by reproductions of the work of Canadian artists. It is expected that this lecture will be of particular interest to those who desire an introduction to the historical development and characteristics of Canadian art.

Sectional Trophy To Be Staked On Debate Tomorrow

MCGILL'S Eastern Canada Debating crown will be at stake tomorrow night, when Philip Vineberg and Donald Black will engage in a radio debate with Dalhousie University representatives, from 9:00 to 9:30 p.m. The motion, which McGill will support, is "Resolved that Canada will never be a nation so long as there are separate provincial governments."

Two weeks ago, Eli Kelloway and Chuck Wayland defeated the representatives of the University of New Brunswick, putting McGill in the sectional finals. A victory tomorrow night will mean direct competition with the Ontario division.

The shield, symbolizing the Eastern Division Championship, was presented to McGill by the Canadian Radio Commission a few months ago. This tomorrow's radio debate holds special significance, for a win then is necessary for the retention of the newly-acquired trophy.

MACCABEAN CIRCLE

A meeting of the Maccabean Circle is being held this Sunday afternoon in the Union Grill Room. The guest speaker will be David White. (69)

Dr. Collip Speaker At Physical Society

DR. J. B. Collip will speak on Hormone Research before the Physical Society today at 5 o'clock. He will give a general discussion of the significance of hormones in the physiological phenomena.

Dr. Collip is professor of Biochemistry at McGill and is internationally known for his research work in this subject. He is a graduate of Toronto and Alberta Universities and is a Fellow of the Royal Society. He came to McGill in 1928 after collaborating with Banting at Toronto in the discovery of insulin.

University Loses Services Of Dean Eve By Retirement

Writing Contest Of Arts Magazine Concludes Today

Board Announces Many Contributions Received to Date

TODAY marks the dead-line for the Arts Undergraduate Magazine Competition. All contributions of short stories, poems, and articles must be handed in today. It was announced last night by the editorial board of the magazine.

This competition was given out before Christmas holidays and to date many contributions have already been received. Three prizes have been offered for the best short story, poem, and article submitted. The awards, each five dollars cash, will be allotted by the judges, Drs. H. G. Files and C. W. Hendel.

During the past week a special committee has been chosen which includes a woman student from each of the four years in the faculty of Arts. This committee will have charge of subscription sales. The names will be released shortly.

This is the second year of this publication, the official organization of the Arts Undergraduates. Copies should appear on the campus about the first of April. It will sell for twenty-five cents a copy.

Although today is the last day for those entering the competition, contributions are still acceptable, though they will not be eligible for a prize. These may be turned in at the Union Tuck Shop.

Dr. W. F. Jackson Of Brockville Dead

DR. WILLIAM FREDERICK JACKSON, who graduated in Medicine in 1873, died at his home in Brockville on Tuesday night, after a long illness.

Dr. Jackson was born in Brockville, where he obtained his early education. He studied Medicine here at the same time as Sir William Osler, and graduated before the age of 21, after which he began practicing at Brantford, where he formed a close friendship with Dr. Alexander Graham Bell. Dr. Jackson was associated with the inventor in the manufacture of the first metal diaphragm to be incorporated in a telephone.

In 1916, at the age of 64, he went overseas in the capacity of a captain of the Canadian Army Medical Corps, and served several hospitals in England. Having returned home, resumed his practice, from which he did not retire until past the age of seventy.

ATTENTION ARTS '37

Will the man who left the envelope for Parker Chesney on the notice board of the Union get in touch with a member of the class executive as he neglected to put his name with it.

England Surpasses European Countries In Social Policies

View Expressed by Prof. Brockwell at St. George's Society Meeting

REFERS TO EINSTEIN Aim of Society to Assist Englishmen On Canadian Soil

Professor Brockwell of the Department of Oriental Languages stated at the hundredth annual meeting of the St. George's Society, Tuesday night, in the Windsor Hotel, that Britain has by far surpassed the continental countries in the matters of social policy and the status of the individual. Among those present at the meeting were Right Rev. John C. Farthing, Bishop of Montreal, and Mrs. Farthing, and Dr. John Hughes, successor to Dr. Fred Clarke, former professor of education at McGill.

Self-control and self-sacrifice have always been a feature of England's international behaviour, declared Professor Brockwell, and these traits are due to the unified and peaceful spirit of the nation, so much in contrast to the general feeling of the times.

Einstein's Praise

The speaker referred to a recent conversation with Einstein, during which the famous author of the theory of relativity said that "England was far in advance of any nation in the world in every branch of learning and scientific research." England's advance in science had been a complete revelation to Einstein, Professor Brockwell added.

The history of the society, which was established 100 years ago, was reviewed by H. G. Norman, who was re-elected president. The first meeting was held in 1835, the membership at which time was 48, compared with 382 at present. The aims of the society, he said, were to assist Englishmen, or those of English extraction, who had come to Canada from England and found themselves in difficulty. Economic trends had brought about changes in the activities of the society, but every effort is being made to render assistance to those coming within the scope of the society's activities during the depression.

"As a result of improved conditions, calls upon the society for assistance during the past year have not been as great as in the past," Mr. Norman said.

The report of the treasurer showed a deficit for the year ending December 31 last of \$484.63.

Delegate Describes Anti-War Congress

Mendel Laxer Addresses League Against War Tonight

Mendel Laxer will describe the highlights of the first International Congress of Students against War and Fascism tonight in Strathcona Hall when he will address the McGill League Against War. The gathering is an open meeting and is scheduled to start at eight o'clock.

As an official delegate, Laxer attended the Congress held last month in Brussels. The only other members of the Canadian delegation were two representatives from the University of Toronto. In his address Laxer will outline the proceeding of the Congress and will also give the opinions expressed by some of the outstanding delegates. He will also analyze the political significance of the Congress for the Canadian student.

During the week that it met, the Congress attracted a great deal of attention, both on the Continent and in America. Consisting as it did of hundreds of delegates from more than forty countries, it represented a great section of world student opinion.

Besides giving his speech this evening, Mendel Laxer is preparing a series of articles which will appear from time to time in the Daily. These articles will contain reports of the happenings at Brussels and also his reaction to the Congress.

Graduate Honored

Formerly a student at McGill, J. G. Saxe was elected president of the New York Bar Association. This Society elected Senator Saxe at its annual meeting held last Saturday evening in New York City.

While residing in Montreal, Senator Saxe attended the Montreal High School and then went to McGill, where he graduated in 1897. In 1914 he was honoured by his alma mater by having conferred upon him the honorary title of M.A. He is also president of the McGill Graduates' Society in New York.

Dental Ball Set For Tomorrow At Mount Royal

THE Plaza of the Mount Royal is in readiness for the annual Dental Ball, which takes place tomorrow night. The large sale of tickets is partly because of the great number of demands from graduate students, as well as from other faculties. The remaining tickets are on sale now at the Union Tuck Shop.

Gilbert Shulman, chairman of the committee, is managing the affair. Among the patrons and patronesses will be: Dr. A. L. Walsh, Dean of the School of Medicine, and Mrs. Walsh, Dr. and Mrs. I. K. Lowry, Dr. and Mrs. G. G. Armitage, Dr. and Mrs. S.H.A. Baxter, Dr. and Mrs. W. L. Marlow, Dr. and Mrs. W. C. Buchell, Dr. and Mrs. F. G. Henry, Dr. and Mrs. W. G. Leahy, Dr. and Mrs. A. W. McClelland.

Improved Version Of Annual Planned

Bigger and Better Magazine Aim of Executive

LOW PRICE POSSIBLE Fifty Cent Reduction if Sales Show Increase

In addition to an improvement in appearance and the quality of the contents, the Annual Board has promised a reduction of fifty cents in the price of the Annual this year, provided that the total sale shows an increase of 25 percent over last year. This applies only to those who sign for their copies, and cash customers will be required to pay the usual \$4.00 rate. The official lists have been posted in all the college buildings and students are advised to use these lists so as to place themselves in a position to take advantage of the reduction if it should go through.

The Students' Council has helped to secure the services of the Southern Press and of the Photo-Engravers and Electro-Platers of Toronto. The work of the latter company has always been highly satisfactory, and the executive has decided to use more pictures this year.

Improvement in Appearance

An improvement in appearance will be secured by using a cover of "Fakir"oid, an imitation leather material. A large number of good photographs have been turned in this year, and these will add to the appearance of the issue. The improvement of contents will be obtained by a modernized lay-out, which, however, will not be too radical. The section known as "Campus Life" has been enlarged and improved; the Feature Department, under Ronald Leatham, promises to be especially outstanding. Articles by prominent members of the staff, as well as students, will be more numerous than usual. The names of these contributors will be announced shortly.

Circle Participates In "McGill Night"

Also to Gather on Sunday in Union Grill Room

"Jews and Minority Rights" is the topic which will be discussed tomorrow at 8:15 p.m. at the Shaare Zion Synagogue at the regular services. This will take the form of a "McGill Night," as the program is being planned, completely by McGill students. The activities will assume the form of a symposium in which Bert Shecter, Morton Godine and Sydney Friedman will participate.

The Maccabean Circle will convene at its regular gathering this Sunday at 3:00 o'clock in the Union Grill Room. The guest speaker to be featured is Mr. David White, a graduate of Harvard University, and president of the American Maccabean organization of which Lord Melchett is the head of the English branch. This society, which was founded in 1932, is the Jewish organization which corresponds in character to the Olympic Games, and the second meet will take place next year in Palestine. Mr. White is a former member of the Harvard track team and he has kept his interest in athletic activities.

The Employment Committee of the Maccabean Circle has been considered efficient up to date. The Y.M.H.A. have made a request for college students who are interested in doing leadership work with boys and girls and older groups next year at the Mc-Y.W.H.A. All those interested are requested to communicate with Ben Shecter or anyone on the committee. Should a sufficient number of students apply the Y will offer a free course in Club Leadership which will

Universities Send Representatives To Medical Banquet

FOUR hundred and fifty guests are expected to attend the Annual Medical Banquet being held this evening. Dr. Morris Fishbein, Editor of the American Medical, will be the guest speaker. The topic of Dr. Fishbein's address will be "Medicine in the Changing Social Order."

Representatives from several universities are expected to be present, including delegates from Toronto, Queen's, Dalhousie and the University of Montreal. The toast to the Graduating Class will be proposed by Professor Thompson and will be responded to by G. G. Garcelon, president of fifth year. Dean Woodhead will reply to the toast to the University. The other Universities will be toasted by W. D. Norwood, while the response will be given by Professor Mainland of Dalhousie.

Canadian Society Announces Official Triennial Meeting

Members Meet to Promote Higher Commercial Education

THE triennial meeting of the Canadian Society for Commercial Education will be held in Montreal at the School of Higher Commercial Studies on February 2nd at 12:30 p.m. The aim of the society is to promote in Canada at every stage the cause of commercial education. With that purpose in mind it strives to make professors, business men, industrialists and others converse.

This bilingual society with activities throughout the Dominion is also affiliated to the International Society for Commercial Education, which itself has a very great influence in the world of commerce everywhere. Thanks to the International Society, the experience of other countries is made accessible to Canada, surely a most precious thing for a young country as this is. The Canadian Society has been represented both at the Economic Course and at the Congress ever since the Canadian Society has been formed. Moreover, every member of the Canadian Society becomes automatically a member of the International Society.

The membership of the Canadian Society is classified in the following three ways:

- Collective members. This category is reserved to universities, schools, associations, societies, business and industrial firms and financial houses.
- Active individual members. This category is open to those persons who join as private members.
- Life members. Founded in 1932, the Canadian Society has already more than sixty active individual members, as well as many collective members. Yet in order to go further ahead with the work of ensuring a more frequent exchange of views between business men and those responsible for schools and college of commercial education, at Congress itself, or in conferences and study meetings, the influence of the society needs even now to be considerably strengthened by the addition of many more members.

Commercials Hear Mr. Kennedy At Luncheon Today

At the Commercial Undergraduates' Society Luncheon to be held today, those present will hear the Vice-President and Managing Director of the Northern Rubber Company, Mr. Thomas Kennedy. Mr. Kennedy has chosen to give a talk on "Industrial Problems in Canada," a subject which is of interest today to all Canadian citizens.

The lunch, at which the meeting of the Commerce Society will be held, is scheduled for one o'clock sharp, in the Union Grill-room. Tickets on sale, in the hands of the class officers, are obtainable at forty cents each.

Wally Markham, the president of the Commerce Undergraduates' Society, is the chairman for the luncheon. This is the monthly meeting of the Commerce students.

Status Of Canada's Constitution Subject Of Papers Tonight

"Amendments to B.N.A. Act to be Considered"

HOLD FOURTH MEETING

Vineberg and Walsh Will Address Political Economy Club

Students interested in economic and political problems will gather tonight at the fourth meeting of the Political Economy Club to be held in the Smoking Room of the Arts Building at 8:15 p.m. The speakers will be Phil Vineberg, Art '36, and Allison Walsh, Law '36, and the subject under consideration will be "Amendments to the B.N.A. Act," with special emphasis on the necessity and method to be adopted for effecting them. The topic is one which has given rise to much speculation and it should also be of interest to students of history and sociology as well as economists.

The first speaker, Vineberg, will emphasize the fact that the Dominion Government is now in danger of having all social legislation measures deemed unconstitutional unless the B.N.A. Act, as at present constituted, be drastically revised. Canada cannot possibly contend with current social and economic problems under the present distribution of legislative powers.

Strong Central Government

Though the intentions of the framers of the Constitution were that Canada should have a strong central government, the B.N.A. Act has been greatly modified by the decisions of the Judicial Committee of the Privy Council. In effect, the decisions rendered by that body since 1916 have been to greatly strengthen Provincial powers at the expense of the Dominion. From 1932 on, however, there has been a reaction, but not sufficient to justify any strong belief in the possibility of the Dominion Government legislating on matters of national importance.

The B.N.A. Act, having been drafted when Canada was almost completely on an agricultural basis, does not conform with existing conditions. Besides, the economic policy then in vogue, laissez faire, has been greatly discredited, so that any measures designed to effect for Canada a planned economy will necessitate constitutional changes.

Second Speaker

Allison Walsh, Law '36, will handle the subject with a view towards outlining the most expedient manner of amending the constitution. He will also trace the various interpretations placed upon sections 91 and 92 of the

Montreal Orchestra Holds 98th Concert

Children's Concerts to be Featured Saturday Morning

Douglas Clarke, Dean of the Faculty of Music at McGill will direct the Montreal Orchestra in its 98th concert on Sunday, February 3rd, at His Majesty's Theatre at 9:00 o'clock. Only four more concerts will be given before the end of the season. For Sunday's program selections which are expected to suit the general taste have been chosen. The orchestra of seventy men will play:

INTERVAL

Symphony No. 5 Tchaikowski
Two children's concerts will also be given by the Montreal Orchestra under the direction of Douglas Clarke. The first of these will be given in the Salle Doree of the Mount Royal Hotel, Saturday morning, February 2nd, at 11 o'clock. Adults will be admitted to these concerts only if they are accompanied by children.

Mr. Clarke will explain to the audience the instruments of the orchestra and the music to be performed. The Protestant Board of Commissioners have recognized the educational value and these concerts have been undertaken by the orchestra in the belief that music can be enjoyed at any age. The program consists of selections from requests sent in by children, and is as follows, for the first concert: Symphony in G (Surprise). First two movements Haydn (1732-1809)
Overture: Hansel and Gretel Humperdinck (1854-1921)
Scherzo: A Midsummer Night's Dream Mendelssohn (1809-1847)
Symphony: No. 2, in D; First Movement Brahms (1833-1891)
Entrance of the Little Fauns (Cydalise) Piere (1893)
Nutcracker Suite, First three numbers Tchaikowski (1840-1893)
Shepherd's Hey Grieg (1843-1907)

Vol. XXIV—Thurs., Jan. 31, 1935—No. 68
The B.N.A.
THIS evening the members of the Political Economy Club will be spoken to on the subject of the B.N.A. In view of the recent proposals made by Premier Bennett, which will undoubtedly involve some changes in our constitution if they are to be carried out, this meeting is of more than the ordinary interest. Unfortunately far too few people really know or understand the main provisions of Canada's Constitution as embodied in the B.N.A.
It seems to the layman a very simple thing for the government to decree that everyone in a certain industry shall not work longer than say six hours, five days a week. But by what right does the government pass such an act. The opponents of any government regulation come along and say, "Oh you have no right to pass such a law. It does not come within your power, but within that of the provincial government." Up until the present time the supreme court of appeal for the British Dominions, the Judicial Committee of the Privy Council, has said, "yes the Dominion Government has no power or authority to pass such a law, for it infringes on the legislative rights given to the provincial governments by the British North America Act of 1867."
How therefore is such legislation to be uniformly obtained? It is almost an impossibility to force all the provincial governments to pass similar measures, or to agree to one uniform law, as the present state of affairs in Canada very eloquently indicates. The only reasonable and rational solution is to give the central government sufficient power and authority to legislate on such subjects in spite of the provincial sphere of legislation. There is but a single method of doing this, and that is by amending the British North America Act. But here we run into another snag, what is the procedure to amend it?
When the Act was drawn up in 1867 no provision was made, stating how it should be amended if that was ever necessary. Any changes in it, must be known, made by the imperial parliament. Will this body, however, amend it at the request only of the Federal Government, or will it require the assent also of a majority of the provinces, or of all the provinces to the suggested amendments. No one really knows just what is going to happen — although some possibilities seem more obvious than others.

PANEGYRICUS
By McParfootin
It Ain't Fair
THE general student body is quite a tolerant sort of organism—up to a point. College manhood and womanhood can endure a good deal without wincing, but there's a limit. Take the Players' Club, for instance. Twice a year they produce some big drama or other, and Ellen Terrys and John Barrymores, who would probably do better as Burns and Allen strut their stuff, accompanied by long and loud preambles, and hoolybah or ballyhoo manufactured by some nincompoop who has nothing better to do than call himself a publicity manager. But that's beside the point, and we love the drama. We love acting. We love the Players' Club. We love the girls in the Revue Chorus. We love the girls in the Revue Chorus. We are not sparing in our affections, but that is neither here nor there.
Not content with their past efforts, they now attempt to saddle us with a chunk of Central Europe and reproduce an inn in the Austrian Tyrol, but what's the Pig & Whistle for? Or the Ritz Bar? (We cater to every taste). It's as plain as the nose on anybody's face, that if that Shavian effort of last November didn't send us to the devil, they're doing their best to make Autumn Crocus. Our head is bowed to the inevitable.

Justice Will Clout
THE daily press of America is bent upon humanising the law, it is making a splendid job of it. Not only is it transforming that austere machine of doling out justice into a kindly old dutch uncle, but it even makes a staid courtroom look like home sweet home. Of course were referring to the Hauptmann Trial, which like all other popular subjects of conversation, including the weather, must perforce crash this column.
The defendant's guilt or innocence notwithstanding, we venture to forecast that the Great American Public will make most of its new national hero. Should the twelve good men and true pronounce an acquittal, we may well expect to see in

the next newsreel, sandwiched between Mussolini reviewing the Swiss Navy and pretty Florida maidens diving gracefully into crocodiles' jaws in Miami, the freed Hauptmann, smiling the smile of victory, with the vibrant voice of Graham MacNamee giving suitable sound effects. And not only that, for we can also look forward to special stage appearances on Broadway, where the new idol will spar four or five rounds with Maxie Baer, or deliver a discourse on the purposefulness of Life.
And if the verdict is "Guilty!" who knows but what some enterprising movie company will acquire exclusive rights to the electric chair scene, which will be incorporated into a slashing indictment of crime, not to doubt, "Crime Don't Pay—With Goldwyn's Beautiful Girls—A Sensational Exposure."
Our daily press, forsooth! How it makes life worth living!

A New Toy
WHEN a quick-tempered person is advised to count ten to give his temper a chance to subside, and providing he can count, we observe in this advice one of the finest advances of our civilisation—the sublimation of a damaging emotion. Thus it is, that when you refrain from socking the guy you hate (he's bigger than you, anyhow), and tear up a piece of paper on which you've called him every name under the sun, you can consider yourself at quite a lofty cultural stage, providing that the process gives you a thrill. Working on this theory, we propose to give a new invention to the world. After hearing our Prime Minister declare that capitalism isn't all that it might be, to climax the persistent verbal attacks on that institution by all and sundry, something should be done to remedy the situation.
The revolutionary invention that bids fair to take the world by storm is something like this: It is sold in two pieces, for thirty-five cents. It consists of a finely wrought steel mallet, and a glass bulb equipped with a little percussion cap, and inscribed in red with the following:—"The Capitalistic System." It will be sold to all dissatisfied persons, who will now have something on which to vent their spleen. Instead of wallowing in polemics, instead of proving the doom of capitalism by yards of economic arguments, instead of ranting from a soap-box or tossing dynamite as a gesture of goodwill, the objector need only subliminate his emotions, and sock the bulb with the mallet. The crash will be most satisfying, and everybody will be happy. Refills will be sold for fifteen cents. The McParfootin Sublimating Agency, which will be incorporated very shortly, will, upon request, issue similar globes inscribed "The Red Menace," "The Fascist Menace," "Adolf Hitler," "Mussolini," "Calvin Coolidge," "English Two," "Nine O'Clock Lectures," or anything that your heart desires. Watch out for further developments.

Frosty Financing
THOSE of us who have been compelled to do without that trip to Bermuda this year, owing, shall we say, to pressure of studies, and are exposed to that menace to our body politic, to wit, the capricious Canadian winter, may expect some relief. That is to say, a fortune can be made under our very noses. According to a very trustworthy source, we hear that the Montreal Stock Exchange is in for some sturdy competition. It seems that some enterprising Commerce student, who tried working his way through college by selling armaments to the League Against War and Fascism, has hit upon a quicker way of making a fortune for himself, and incidentally, for others.
Briefly, his scheme is a sort of Temperature Exchange. Making full use of the Canadian weather fluctuations, his Exchange will sell degrees Fahrenheit to all comers. There is no par value, or anything complicated. No gilt edged certificates. You buy Westmount Heights Preferred at two below zero, and sell the next day at thirty-six above, making a small fortune. You speculate with Montreal West Exaggerated at forty-six, and sell short, because your rheumatism has told you that snow is expected on the morrow, accompanied by a distinct drop in temperature. You go to bed in the midst of a heat wave, having been ogled by a confidence man into buying 300 Griffintown Gasolins at 85 bid, and wait until winter, being forced to sell at 52 below zero on the Winnipeg market. You are wiped out. You go back to college, and continue selling armaments, this time to Mahatma Gandhi.

Let it be known that we do not favor gambling in any form. But if you must, try the Canadian climate. It's grand!
McPARFOOTIN.

AIRING THE AIR WAVES
BY ELENPY
Hi, Eddie!
SOME of our readers will no doubt remember the fact that a few weeks ago we have in this same column said a few things which were not very complimentary to Eddie Cantor. At that time Mr. Cantor was still with the Chase & Sanborn Company on a one-hour program. We thought at the time that his efforts to make the long program an interesting one were a failure, and we still think so. However, Eddie is coming back to the air now in a new program which will be broadcast by the Columbia Broadcasting System on Sunday at 8:00 p.m., and far be it from us to harbour our erstwhile grudge against his sense of humour. Since his last broadcast we have seen Mr. Cantor in the movies, and we have come to the conclusion that a half-hour program is more suited to his type of humour than a very long one. It is thus that we take great pleasure in welcoming Eddie Cantor back to the air on Sunday, February 3. We hope that his trip to Europe has filled him with ideas for new gags and laughs, and we will look forward to giving him all the credit that may be his due in his new series of broadcasts. Good luck, Eddie!

New Honors For Whiteman
PAUL WHITEMAN, "The King of Jazz" has again been recognized. This time it was the cream of American Negro entertainers that honoured the jovial "Dean of Popular Music." Before an audience of more than 3500 people W. C. Handy, composer of the "St. Louis Blues," presented Mr. Whiteman with a cup for his "great service in popularizing Negro music."
"I know of no musician in the world who has rendered a service to Negro art comparable to the

part that Paul Whiteman has played in fostering Negro music," said Handy. "Paul Whiteman will always be remembered by the members of my race with gratitude."
"This is one of the great thrills of my life," Whiteman responded. "Members of your race are included among the foremost musicians the world has ever known. Americans are coming to realize this now. Others who haven't will soon."
The gathering for the presentation of the award was attended by such luminaries of the entertainment world as Duke Ellington, Cab Calloway, Ethel Waters, and Noble Sissle.

Stravinsky in America
ON SUNDAY, February 3, at 8:00 p.m., lovers of good music will receive the thrill of their lives when they listen to the General Motors Symphony Orchestra on the NBC-WJZ network. The occasion will be the first appearance before an American audience of any kind of the famous composer and celebrated conductor- pianist Igor Stravinsky. Stravinsky is perhaps best remembered as the composer of "The Firebird" and "Le Sacre du Printemps," as well as the opera-oratorio "Oedipus Rex." His works are of a subjectively revolutionary nature and have been the subject of much controversy in musical circles all over the world. In this first concert on American soil Mr. Stravinsky will lead the General Motors Orchestra in Glinka's "Kamarinskai" and the overture to "Russian and Ludmilla" by the same composer. He will also conduct the orchestra in eight selections from the Nutcracker Suite by Tchaikovsky. Miss Gladys Swarthout, mezzo-soprano of the Metropolitan Opera Company, will be featured as the guest soloist on the same program.

Featuring A Liar
ALL THOSE who have heard the Sunday afternoon program of Tony Wons entitled "The House by the Side of the Road" will agree that there is no need for any more attractions in order to draw listeners. The kindly philosophy of Tony Wons and the musical program supplied so ably by a whole galaxy of radio stars is enough to provide entertainment for any listener, no matter how finicky his tastes may be. However, Mr. Wons has started a campaign to "bring to the microphone members of unusual professions. Thus he has up to now had as his guests such people as a woman blacksmith, and a wild animal trainer. And now Mr. Wons has found a new and very much unique profession—lying. In his next broadcast, on February 3, Tony Wons will feature the president of the Burlington, Wis., Liars' Club. This man is the head of the only Tall Story organization in existence all over the world. In the course of his wide and varied career as a liar Mr. C. C. Hulet has received many tall stories from all over the world. Each year he chooses the tallest of the lot and awards to its teller the first prize for that year. In his coming broadcast it will be Mr. Hulet's duty to tell the tallest story he has ever heard in his life. This may seem a simple job, but it turns out to be a little harder than first appearances would indicate. The stories will be of the calibre of those that won the prizes during the past few years. For example there is the story of the peg-legged cat that hid behind posts and brained mice with its wooden legs. There is also the one about the clock that was so old that the shadow of its swinging pendulum had worn an arc in the back of the case. And to top all those there is the 1935 prize winner that tells of the obedient donkey that took its rider over the edge of a 1000-foot cliff in pursuit of a rabbit, and stopped within ten feet of the ground below when commanded!

Correspondence
McGill Daily.
Dear Sir:—
I read with interest the cheerful letter of Mr. G. B. Glascoo of the Graduates Employment Bureau in last Thursday's Daily. Mr. Glascoo, like so many others, is apparently of the belief that prosperity which has been beaming so steadily around the corner during the last few years is now fully upon us. Mr. Glascoo gives figures to prove that such is the case, and to refute the statement made by Dr. Harry F. Ward before the McGill League Against War that the present is an "unwanted generation!"
Mr. Glascoo states that about 2500 students have graduated in the last five years and that as only 87 graduates from these years are on his unemployed lists happy days are quite clearly here again—the suggestion being that the remaining 2413 are employed. Would Mr. Glascoo inform us upon what authority he makes this remarkable assumption? Is it not much more likely that they are still unemployed, that this social system has nothing for them but idleness and despair, that they are, as Dr. Ward has said, an "unwanted generation?"
I noted in the last number of the McGill News, in statistics also issued by Mr. Glascoo, that 1228 graduates have registered at the Graduates Employment Bureau in the last five years and that of these only 321 have been found positions—many of which are presumably temporary. There should be therefore 907 students still registered as unemployed. As Mr. Glascoo states in the Daily that only 87 students from the past five years are so registered the remaining 820 must come from other years. Could Mr. Glascoo tell us from what years? A generation is not limited to five years but to twenty-five. Is Mr. Glascoo's office frequented only by the aged?
In view of these figures Dr. Ward's statements take on a new light. Mr. Glascoo, who doubtless conducts his Employment Bureau with the utmost efficiency (and it is not the purpose of this letter to presume otherwise) is only able to place 321 trained university graduates out of 1228—that is about 25 percent. And the present generation does not by any means consist only of university graduates. If only 25 percent of trained university men can find work what must be the plight of the ordinary unskilled worker? The answer is of course to be found in the appalling conditions of destitution, misery and unemployment in which vast masses of our population are living today, and from which there is, within the framework of the present economic system, no hope of relief.
When Dr. Ward said we are an unwanted generation he meant just that. This society has no use for 75 percent of us. This society due to the lunatic contradictions within its economic basis, which keep a constantly diminishing handful of individuals in parasitic luxury by driving down the

mass of the population to degradation and semi-slavery, and which will presently lead us in 1914 to another world holocaust in the interest of bigger and better dividends—this society has no use for us except as cannon fodder for the resolution of its contradictions by force. And it was just that that Dr. Ward was warning us against. There is no choice for this generation. We must either go down to a bloody death with this society or build a society which will have need for all of us. The bankruptcy of this society, as Mr. Glascoo has shown, is only too obvious.
Yours faithfully,
ALBERT MARCUS.

REVUE
COSTUMES
The following must report before 5 o'clock today for fittings:
L. Savage
A. Atkinson
E. Ross
C. Wright
H. Burrows
CHORUS
There will be a rehearsal for the short chorus on Friday at 5 in the Union Ballroom.

PLAYER'S CLUB
There will be a meeting of the Properties Committee at 4:00 in the Union Music Room. Would Henry Schafhausen please come, if possible.
Will the following please report at the Music Room of the Union at 5 o'clock this afternoon, for a rehearsal of "The Pot-Boiler":
Jim Davis
Harold Webber—
Miss Dubee

THE WORKSHOP
The scripts for "Who's Who" are now here; will the following please call for their copy at the Tuckshop, as early today as possible, and study it carefully: Reginald Annett, Ruth Cohen, Arnold Drew, Godfrey Archbold. Rehearsal will be in the Music Room at 4.

S.C.M. NOTES
TODAY
1:00 p.m. Art of Living group cancelled.
1:30 p.m. "The Place of Religious Education in Bringing about Social Change," Miss Nina Yeomans.
Miss Yeomans wishes to meet with all students interested in the religious education of young people.
An outline will be given of the summer camps at Cedar Lodge. Those interested in leadership training camp should be present at this meeting.
2:15 p.m. Records II, M. G. Brooks.
6:00 p.m. Cabinet meeting cancelled.
FRIDAY
1:30 p.m. W.S.C.F. Committee.
4:30 p.m. Choir Practice; Strathcona Hall.
Social Problems, F. King Gordon.
SUNDAY
Divinity Hall Chapel.
Murray G. Brooks will speak on "Why we come to College."
8:45 p.m. Open House. Miss Anne Van Stone. — Appreciation of Canadian Art.

NOTICES
UNCLAIMED LETTERS IN THE REGISTRAR'S OFFICE
Davis, W. K. L.
Lova-Dickson, H. H.
Ferris, Professor E.
Hamill, Clarence
Kernell, Matt.
MacGill, Patrick
Price, Dr. Ruth
Richards, Berry
The Registrar would be glad if anyone who knows the address of any of the above names would notify him within ten days of the posting of this list. After ten days all unclaimed letters will be returned to the Post Office as Dead Letters.
WANTED
To purchase a 1931 Annual. Please phone Lanc. 5025. W. Markham.
Will the person who borrowed the current "Esquire" (Magazine) from the Reading Room of the Union kindly return it as soon as possible, and no questions will be asked.
SIGMA ALPHA MU SCHOLARSHIPS
Two scholarships of \$100 each for the present session and two for each of the succeeding four sessions have been presented to the University by the Montreal Alumni Club of Sigma Alpha Mu Fraternity.
They are to be awarded to needy

students of good academic standing and are open to men in any Faculty. Applications must be made in writing to the Registrar today.
McGILL UNIVERSITY
PHYSICAL SOCIETY
The seventh sessional meeting of the Society will be held at 5 P.M., on FRIDAY, February 1st, 1935, in the Main Lecture Theatre of the Macdonald Physics Laboratory.
Speaker: Professor J. B. Colpitt, F.R.S.
Subject: Hormone Research.
All interested are invited to attend.
W. BRUCE ROSS, Secretary.

GERMAN DEPT.
The Department of Germanics will present a repeat performance of "Die Deutschen Kleinstädter," a comedy in four acts by Kotzebue, on Thursday, February 7th, at 8:30 P.M., in Moyse Hall. The public is cordially invited.
LOST
Lost, a pen, maroon and black, on way down from Medical Building. Please return to Bill Gentleman in the Arts Bldg. (71)
BADMINTON CLUB
The McGill Badminton Club will play at the Union this evening at 7 and Saturday afternoon at 3:30. (71)
MACCABEAN CIRCLE
Members of the Maccabean Circle are to be the guests of Shaure Zion Congregation this Friday at the regular late Friday evening service at 8:15 p.m. The following members of the Circle will participate in a symposium on "Jews and Minority Rights": Ben Schechter, Morton Godine and Sydney Friedman. All members are urged to attend, as this service is being held in honour of the Jewish students at the university. (69)

DANCING SOCIETY
The Dancing Society will meet this afternoon at 4:30 in the R.V.C. gymnasium.
LEAGUE AGAINST WAR
Mendel Fraser will address a meeting of the League Against War tonight at Strathcona Hall. The subject will be "The International Students' Congress at Brussels."
CLASSICAL CLUB
A meeting of the Montreal Classical Club will be held tonight, Thursday, at 8:15, in the R.V.C., when Professor Carruthers will lecture on "This Greek Epigram." Everybody is welcome. Refreshments will be served.

McGill Strengthen Hopes For Fourth Group Play-off Place

AS SEEN BY A SPORTS' OBSERVER

By A. D. S.

JAMES R. ANGELL, President of Yale University, recently speaking on the subject of intercollegiate athletics, stated: "The young man who wishes to give all his time and energy to sports is quite entitled to do so—but he has no place in a really reputable college where intellectual development is the primary concern. A collegiate institution of which this is not true is a traitor to its trust."

THIS statement provides as good a yardstick for the measurement of "overemphasis" as any observer could desire. College, in the final analysis, is a place for study and football is a game the students play in their spare time—for the mere sport of it. The college which enrolls students who are there primarily to play football, and who accept college work as a necessary evil, is, as President Angell stated, being false to its trust.

PROFESSIONAL tennis evidently has its compensations. A recently published financial statement on last winter's Tilden Tour shows that it was young Ellsworth Vines who pocketed the largest share of the net gate receipts on that trip and not the forty-two-year old tennis maestro, Bill Tilden, as the former cut in for \$62,000 as against Tilden's \$47,000. However, with only a dime in the pocket and a hole in the other—I cannot work up any great enthusiasm over the fact that Tilden, with \$47,000 for four months' tennis playing, was outrageously underpaid.

THE path of the American football coach is indeed a slippery one. Witness the fact that the following schools of higher education have seen fit to discharge their 1934 mentors and to seek new gridiron generalissimos: Harvard, Southern Methodist, California, Louisiana State, South Carolina, Bowdoin, Northwestern, Missouri, Mississippi, Swarthmore, Colorado, Rochester, Vanderbilt, Kansas State, Tennessee, Duquesne, Dickinson, Loyola (La.), Western Maryland, not forgetting, among others, good old Slush.

EDWARD "STRANGLER" LEWIS, the Patriarch of Wrestling, the survivor of over five thousand contests and one who held the undisputed world's championship on four occasions, averages upwards of one hundred thousand miles of traveling yearly when fulfilling his engagements. Though forty-three years old, this veteran of a quarter of a century in the grunt and groan industry, came out flat-footed in a recent statement relative to the marked changes in wrestling to the effect that college wrestlers, with their introduction of flying-tackles, rabbit punches, airplane tosses and the like, are responsible for the innovations now in use among the rascaling fraternity. Incidentally, Lewis accorded the English as being the finest sportsmen in the universe.

SPORT absurdities have given sport-followers such spectacles as the six day bicycle race, Walkathons, tree-sitting contests, and the like. The latest marathon record to be attacked and a new standard to be left for morons to better is golf. A Californian recently established a new record for continuous play when making 459 holes which involved walking a distance of over twenty-five rounds of golf lasting thirty-nine hours of continuous play. The new record-holder, who used but a single club, bettered the previous record of 376 holes made last fall, finally retired for repairs owing to badly swollen ankles.

Senior Hockey Sextette Defeats Victorias By 6-4

Crutchfield Leads Attack With Three Goals — Pidecock Plays Well In First Senior Game — Scores Goal — Lamb Injured But Continues Play — Ottawa Defeated Royals 4-3 In First Game

MCGILL'S senior hockey squad moved another step forward in its drive for a playoff berth last night, by defeating Victorias 6-4 in a wide open game at the Forum. As a result of this win the McGill team gained sole possession of fourth place in the league standing, four points ahead of the fifth place Verdun Leafs. Ottawa stopped Royals 4-3 in the first game of last night's double header, thus leaving the first place still open to four teams.

Crutchfield Stars
Led by Gordie Crutchfield, who scored three goals, the Reds ran up a 2-1 lead in the first period, held the Vics to 3-2 in the second, and increased the lead to 6-4 in the third. Both teams played wide open hockey, and the pace was fast throughout, but the calibre of play was not up to the standard of the last two senior group games which the McGill team played.

Alex. Duff scored a pretty goal a minute after the start of the game, driving a high shot past Coulter in the Vics nets, from twenty feet out on the left wing. Bob McLernon made the play for the goal. Crutchfield made it two to nothing for the Reds ten minutes later, getting a soft goal when the puck slid off the end of his stick and rolled under Coulter who had dived out to intercept a pass to McLernon which "Crutch" was intending to make. Tapin cut the lead by a goal a few minutes before the end of the period, beating McHugh on a backhand shot to the corner of the net.

Vics Attack
In the second period Vics played their best hockey of the night. Penalties to Wigle, Lamb and Melkielejohn gave the Maroon team openings to score, and consequently Hollie McHugh was forced to make several sensational saves. Desroches scored a well earned goal half way through the period, outguessing McHugh on a drive to the far side of the net. This goal tied the game. Crutchfield, McLernon

Red Intermediates In 3-2 Defeat At Hands Of Bishop's

Chances of Qualification in Hockey Playoff Slim

GAME WELL PLAYED

YESTERDAY afternoon at the Forum the Red Intermediate hockey team went down to their third successive defeat when they lost to the Bishop's sextette. The final score was 3-2 and is a good index of the relative merits of the two teams. For McGill, Byrne and O'Brien scored, on passes from Elwood and Byrne respectively, while Christison, Carson and McMahon notched tallies for the Lennoxville team.

By this loss McGill's chances of securing a place in the final league reckoning received a decided set-back and the Red sextette now maintain the fourth position behind Loyola, the U. of M. and Bishop's.

Closely Contested

The play in the first period was featured by close playing on the part of both teams but Christison gave Bishop's the advantage with a goal near the close. McGill decidedly held the upper hand in the second stanza with Byrne and O'Brien tallying on passing attacks. Bishop's came back strongly in the last period and by virtue of goals by Carson and McMahon, the game closed with McGill seconds on the long end of a 3-2 score.

The Line-Ups

McGill: Goal, Pacaud; defence, Forman, Letourneau; centre, Elwood; wings, O'Brien, Byrne; alternates, Crawford, Loftus, Corbett, Doherty.

Bishop's: Goal, Hibbard; defence, Morris, Christison; centre, Glas; wings, Carson, Brooks; alternates, J. Hibbard, McMahon, Blaissonnet, Powell.

First Period

1-Bishop's.....Christison..... 16.30
(Brooks)
Penalties: None.

Second Period

2-McGill.....Barnes (Elwood)..... 5.30
3-McGill.....O'Brien (Byrne)..... 10.45
Penalties: None.

Third Period

4-Bishop's.....Carson..... 7.10
5-Bishop's.....McMahon..... 19.45
(Carson)
Penalties: Christison, Hibbard, Norris, O'Brien.

PICTURESQUE CHURCH

Millerville — Unique among churches in Canada is the picturesque structure erected here under the leadership of Rev. Webb Peckee, Church of England missionary who came here in 1898. It is built entirely of upright logs of uniform size. Originally the logs displayed their original bark but it was stripped off leaving a curious effect of carved wood preserved by treatment from further inroads.

Red Mitmen In First Elimination Contests Today

Bouts Will Culminate in Interfaculty Meet

THIS afternoon in the Field House Bert Light's mitmen will hold the first group of elimination bouts which will terminate in the Interfaculty meet which is scheduled for February ninth. Saturday afternoon next will be the date of the second in the elimination contests which will then be carried on every Thursday and Saturday afternoons until the Kingston representatives have been selected.

Advance indications point to the fact that McGill will field a well balanced aggregation of boxers for this year's team. Many of the old team are back in fighting harness but Coach Light has made it known that newcomers are welcomed to don the gloves for the coming meets.

The bouts scheduled are as follows:

125 pounds—Yancey vs. Corcoran.
125 pounds—Bercowitz vs. Prince.
125 pounds—Hawkins vs. Ferguson.
135 pounds—Cushing vs. Notman.
135 pounds—Sadler vs. W. H. Black.
135 pounds—Louis vs. Bilsky.
145 pounds—Fullerton vs. Smart.
145 pounds—MacCallum vs. Ferguson.
145 pounds—Morgan vs. Monette.
145 pounds—Wisdom vs. Reynolds.
155 pounds—Macaulay vs. Hay.
155 pounds—MacKay vs. Corbett.
165 pounds—Bob Kenny vs. Wilson.
165 pounds—Eastman vs. Walker.
175 pounds—Scott vs. Fred Porter.
118 pounds—Aitken vs. Swalsky.
118 pounds—Caron vs. Toll.

Commerce IV Win In Hockey Game Over Dent. Sophs

In a game which was characterized by its speed and roughness Commerce 4 yesterday afternoon defeated Dentistry 2 by a 2-0 score. Commerce showed plenty of power in administering the white-wash and will be strong contenders for interclass honors.

From the opening face-off to the final whistle both teams played wide open hockey and though defeated Dentistry put up a game fight and were by no means outclassed. George Percy opened the scoring near the end of the first period on a pass from Gregson while Max Bishop made it two for the Accountants on a solo effort. For the Dentistry sextette Duff

Med. I Basketballers Defeat Engineering I

In an Inter-class basketball game played yesterday afternoon at the Montreal High School gym, the Medical Freshmen outfit continued to set the league pace by administering a 22-13 defeat to the quintette representing Engineering I. For the winners Rodi and Simpson were outstanding while Orr bore the brunt of the burden for the Engineers.

Engineering I
Westman 0
Reynolds 2
Orr 11
Crowley 0
Snelgrove 0
Curham 0
Poyner 0

Co-ed Hockeyists In First Game Today

Two Inter-Mural hockey games are scheduled for the MacTavish Street rink at two o'clock this afternoon when the R.V.C. hockey league gets underway. All co-eds are requested to play irrespective of whether their names are listed below. Fred Wigle has taken over the coaching duties this year having succeeded Kenny Farmer.

INTERCLASS HOCKEY SCHEDULE

Today, Jan. 30: 4-5 Eng. I vs. Com. I; 5-6 Com. 4 vs. Dent. 2; 6-7 Arts 3 vs. Eng. 2.
Friday, Feb. 1: 4-5 Arts 1 vs. Com. 2; 5-6 Eng. I vs. Law 2; 6-7 Theol. 1 vs. Eng. 2.
Mon, Feb. 4: 4-5 Theol. 1 vs. Com. 1; Wed., Feb. 6: 4-5 Com. 4 vs. Eng. I-Y; 5-6 Theol. 2 vs. Eng. 4; 6-7 Med. 2 vs. Dent. 2.
Fri., Feb. 8: 6-7 Theol. 2 vs. Arch. Mon., Feb. 11: 5-6 Com. 4 vs. Law 2; 6-7 Med. 1 vs. Eng. 3.

and Goodfellow played strong games.
The Line-up
Commerce 4: Markham, Wisdom, Percy, Gregson, Bishop and Moran.
Dentistry 2: Small, Duff, Hodgins, Goodfellow, Racey and Bourne.

Norwich Wrestling Meet Cancelled; Hold Eliminations

Date of Interfaculty Contest is Advanced

FROM McGill wrestling headquarters comes word that the meet scheduled against Norwich College, Northfield, Vermont, has been cancelled. Instead of Friday evening, February 8th, as previously announced, the interfaculty wrestling meet will take place on Saturday evening, February 9th.

With the college meet but several weeks away prospective representatives of the Red team have been training vigorously of late, on Monday next eliminations will begin for the interfaculty matches and two entrants in each class.

Likely Prospects
Among those wrestlers showing promise are: Black, in the 125 pound division; Elliot, at 145 pounds; Johnson, at 155 pounds; Billingsley, in the 165 pound class; Deakin, at 175 pounds; and Stewart in the heavyweight division.

English I Sextette In 3-1 Victory Over Commerce Frosh

Eng. I defeated Com. I yesterday afternoon by the score of 3-1 in an Inter-class hockey league game. The game was hard-fought from start to finish with bumping and heavy checking being featured on both sides. With half of the first period gone, Derry of the Plumbers broke away alone and scored on a solo effort. Soon again the superior combination of the Engineers took its toll as Duchastel scored the second goal making the score 2-0.

The second period started at a slow pace. In a Commerce rush Cornell making the play, passed from behind the nets to Love who shot hard at Cowie, with Huschlin scoring on a rebound. With a few minutes to play Hall sewed it up for the Plumbers as he bulged the twine on a pass from Duchastel. Both goalies were outstanding in this game.

Comm. I: Duncan, Horsey, Huschlin, Cornell, Love, MacSweeney, Conway, Molson, Porteous.
Eng. I: Cowie, Dunn, Coots, Derrys, Derry, Hall, Griswald, Brown, Duquette, Duchastel, Driscoll, Dupuis.

SKATING PARTY

This Saturday night a skating party has been arranged by the Student Christian Movement at the MacTavish rink. All members of the S.C.M. are welcome to attend and to skate from 8 o'clock until the rink closes. They are then invited to return to the Pit where brown bread and beans will be served, and where a radio will supply music for dancing. Student coupons are required to obtain admittance to the rink.

Practically all cigarette-making machines now used in Egypt are from America.

Astronomer Claims Our Galaxy Stuck In "Space Swamp"

Cleveland, O. — The earth, sun and galaxy way aren't keeping up with the rest of the universe. They are lagging behind in a stagnant "back-water" of space while the rest of the universe expands like a soap bubble at enormous speed.

This "local" section of the universe was thus pictured as a "stick-in-the-mud" before the national academy of sciences, by Prof. Harlow Shapley, director of Harvard college observatory and world-famous astronomer.

At the same meeting the scientists saw amazing movies, the first ever taken of a gigantic "solar bomb" or mass of hydrogen gas, thrown out from a sunspot. It was 40,000 miles long and half as wide, an area of 300 million square miles, and moved at a speed of 240 miles a second or 504,000 miles an hour.

While the universe as a whole is believed to be expanding at a speed of 34,000 miles a second, Dr. Shapley said, there are some local sections of it that are collapsing instead of expanding and other sections, like the vicinity of the earth, that are just standing still. In the universe as a whole the many huge galaxies or star clouds, similar to the milky way, are rushing away from the earth and each other, while in the regions that are collapsing the star clouds are coming nearer together.

The "back-water" in which the earth, sun and milky way are "stuck" is a region of space so large that it would take a light ray one million years to cross it at light's speed of 186,000 miles a second. But this is a very small section of the universe. There are other "back-waters" even larger.

Prof. Shapley estimated that about two billion galaxies, "island universes" like our own milky way, will be within range of the new 200-inch telescope that is to be set up on Mount Palomar in California by the California Institute of Technology. Beyond that there are probably many more, for no one knows how large the universe may be.

The most distant galaxy so far found is apparently rushing away from the earth at 24,000 miles per second, which means that it is 240 million light years away. The universe expands 100 miles per second faster for every million "light-years" out away from the earth. Prof. Shapley estimated the universe started expanding perhaps five billion years ago.

Statistics Show Illinois Students Eat Very Much

Champaign, Ill. — It takes plenty of dough to put the University of Illinois' 9,000 Joe and Mary Colleges through school. Or to be more nearly exact, it takes dough enough for the bakers to make 700,800 loaves of bread each year—according to estimates of local bakers.

And not only are the bakers kept busy pounding edible dough for the thousands of student mouths, but the cooks of Champaign must dish out enough soup to feed all of the unemployed in America for some time.

Then to top the demands of a hungry eating squad, the faithful Holsteins and Guernseys of the Mid West must supply hundreds of gallons of milk. So students are beer drinkers, you think? No, milk is the favorite beverage.

Continuing in the process of eating their way through the university, the 9,000 students consume 124,800 gallons of soup; 453,219 gallons of milk; and enough beef to produce a surplus in the Chicago stock yards.

If 9,000 students spend 30 minutes for each meal, three meals a day, how long would it take them to eat a year's supply of food if they ate continuously?

Perhaps the idea represents an impossibility, but think how much more time the student body could spend on studies, dates, tennis, watching football games, and drinking cokes if they disposed of all of their food in a few short weeks before the beginning of school. It's a scientific problem.

Recent Researches On 'Heavy Water' Lower Its Price

Eugene, Oregon. — "D2O" or deuterium oxide, as "heavy water" is now known, can now be purchased commercially for use in laboratory experiments, and because the price is not out of reach for many institutions and research organizations, interest in this extremely interesting chemical is expected to be higher than ever, it was declared by O. F. Stafford, professor of chemistry. Professor Stafford won national attention with his research project here which involved the concentrating down to heavy water of 10,000 gallons of ordinary water. His concentrate, about 50 gallons, was sent to the bureau of standards at Washington for final processing.

The use of heavy water in research is steadily increasing. Professor Stafford says. One of the most recent is an experiment that involves using the

heart of the heavy water, or deuterium oxide, atom to bombard atoms of sodium and other salts, in an effort to impart artificial radio-activity. There is some hope that in this way a radio-active sodium can be produced which can be used in human therapy, and diseases may be treated by injections of this fluid into portions of the body.

When Professor Stafford began his project nearly two years ago "heavy water" had recently been discovered, and its value at that time was placed at about \$150,000 per quart. A year ago it was still valued at about \$70,000 and difficult to obtain commercially. Announcements received, however, quote the fluid at \$20 per gram for 100 per cent concentration and much cheaper for lesser concentrations.

Recently, Dr. Harold Clayton Urey, professor of chemistry at Columbia University, New York, was awarded the Nobel prize for the work he has done in research on heavy water. With others Dr. Urey in 1932 discovered heavy hydrogen "mass 2" which is just twice as heavy as the common "mass 1" water. Since water is composed of 16 weight units of oxygen to two of hydrogen, the "heavy water" actually weighs more, as the ratio then becomes 16 to 4.

The "heavy" water is obtained by treating ordinary water by electrolysis, and it exists about one part heavy water 5,000 parts of ordinary water. In designating the new fluid, the symbol "D" is used. This water is known as "H2O" and heavy water as "D2O."

Michigan Professor Perfects Apparatus For Splitting Atoms

Ann Arbor, Mich.—Generating more than a million and a quarter volts which sent vivid sparks flashing eight feet, Prof. James M. Cork demonstrated the apparatus with which he hopes to disintegrate atoms.

A small group of physics professors witnessed the experiment. The huge high voltage generator, of which there are but two others in the world, hummed and crackled as the electricity jerked across the room.

That his trial experiment was a success is evidenced by the fact that Professor Cork has already begun the construction on the long, slim vacuum tube through which he expects to send heavy-hydrogen particles at the terrific speed of more than 93,000 miles per second, half the speed of light.

Having attained this velocity, these particles will bombard minute targets of other substances, sodium for instance, at the end of the vacuum tube. When the impact of the hydrogen and the sodium takes place, the sodium becomes radio-active and the neutron is given off. Here there is definite evidence, claims Professor Cork, that the sodium becomes a completely new element, magnesium. Neutrons, together with the electrons and protons form the nucleus of all atoms.

The minute neutron, the discovery of which nearly two years ago has completely changed the whole theory of matter, possesses great energy and a power of penetration greater than any particle of matter has ever had before. It is claimed that it will go through several feet of lead "like nothing."

Professor Cork and his assistants will be in some danger, as the effect of the neutrons on the human body is not known and is believed to incur a considerable reaction.

The neutron given off will be studied by the Wilson Cloud Chamber which records photographically the paths of recoil particles it strikes.

While Professor Cork does not believe that in smashing the atom he will release any revolutionary form of power, and is inclined to belittle the practical value of the energy generated, he is convinced of the great benefit the experiment will be to science.

Rules For Ruining Clubs Or Societies

1. Don't come to the meetings.
 2. But if you do come, come late.
 3. If the weather doesn't suit you, don't think of coming.
 4. If you do attend a meeting, find fault with the work of the officers and other members.
 5. Never accept an office, as it is easier to criticize than to do things.
 6. Nevertheless, get sore if you are not appointed on a committee, but if you are, do not attend committee meetings.
 7. If asked by the chairman to give your opinion regarding some important matter, tell him you have nothing to say. After the meeting tell everyone how things ought to be done.
 8. Do nothing more than is absolutely necessary; but when other members roll up their sleeves and willingly, unselfishly use their ability to help matters along, howl that the association is run by a clique.
 9. Hold back your dues as long as possible or don't pay at all.
 10. Don't bother about getting new members. Let the secretary do it.
 11. When a banquet is given, tell everybody money is being wasted on blowouts which make a big noise and accomplish nothing.
- From the Engineering Journal.

His Birthday Will Aid Paralysis Sufferers

FRANKLIN D. ROOSEVELT
Thousands of United States citizens in all parts of North America were yesterday paying honor to President Franklin D. Delano Roosevelt on his 53rd birthday.

Frost Bites Fatal To Train Jumper

As the result of freezing both legs when he "jumped a freight train" from Richmond, Que., to Montreal nearly two weeks ago, Henri Garneau, 57-year-old resident of Richmond, died yesterday morning at the St. Luke Hospital after poisoning set in. Accidental death was the verdict returned this morning at the inquest by Coroner Prince.

The only witness at the inquest was Marie Fax, 3840 St. Emile Street, who told the court that her husband became acquainted with the victim a few days after he had arrived in Montreal. "Garneau told us that he was without funds, so we kept him at our place. He would not see a doctor for he said he had no money," the woman told the coroner.

However, later when his condition became worse, Mrs. Fax, called in police who had Garneau rushed to the hospital immediately.

Discarding Of Tax Roll Suggested

A suggestion to discard the tax roll as the basis of the city's election list and to ask Quebec for a charter amendment giving the vote to every male British subject over 21 years of age residing in Montreal is today under study by members of the City Council.

If this change is effected, Ald. Leon Trempanier, sponsor of the plan, believes municipal elections will become something more than a theory. The Lafontaine alderman's election ideas have suffered even more radical changes inasmuch as he now even hints that votes for women are not entirely outside the sphere of possibility.

Police Director Studies Plans For Campaign

Director of Police Dufrane is studying plans for a second campaign against careless motorists as the outcome of a written suggestion received yesterday from Ald. W. S. Weidner.

This campaign, if born to actually, will be launched against the hasty intersection crosser; the motorist who "speeds" across intersections at over the by-law limit—eight miles an hour. The city councillor suggests these lawbreakers be summoned to court and given the maximum fine of \$40 and costs.

BRAKE INSPECTION

The movement for compulsory inspection of automobile brakes, inaugurated by Director Fernand Dufrane of the Montreal Police Force, will receive the full cooperation of the Province of Quebec Safety League, said Arthur Gaboury, general secretary of the league at the annual meeting held at noon yesterday in the Mount Royal Hotel. The work of the league for the year was reviewed, and officers for 1935 were selected.

Kenneth S. Barnes was awarded his full claim of \$31,379, allegedly owing to him for sums of money and shares of the Noranda Mine loaned to Neil R. Sinclair, according to a judgment rendered by Mr. Justice Gibson in Superior Court yesterday.

King's, Roslyn Teams Win in School Hockey

The Westmount Public School Hockey League opened on Monday with a close and well-played game when King's School took a fall out of Queen's, last year's champions to the tune of 3-1. Bennett and the diminutive Dolg were the stars of the winners while Ward and Hellyer were best for the losers. Both goalies started but every player on the ice showed a good brand of hockey for such youthful teams. Roslyn defeated Argyle 10-1 in a league game played yesterday.

"Fruit Maroons" Win Annual Hockey Game

Fruit Maroons, master-minded by Morris Shapiro won the annual wholesale fruit dealers hockey match last night at Coliseum Rink defeating Ernest Laurin's "Fruit" Canadiens, 6-2. Red Benny, Jack Fulton Sinclair and Stedman were crown for Maroons. A cup was donated to the winners by Tarry Vipond and presented by Albert Jorman. Canadian National Tournaments team has issued a challenge to the winners.

H. Douglas Heads Griffintown Club

H. P. Douglas was elected president of the executive board of the Griffintown Club, at the 26th annual meeting of the club, held in the club building on Ottawa St. yesterday evening. He replaces in office Dr. J. C. (Phil) Flanagan, who has held the position since 1927. Reports of the various committees of the club for 1934 were presented and approved, and the executive board and general committee for the coming year were elected.

"We have too long entertained the dictum 'The poor ye have always with you!'" said the retiring president, Dr. Flanagan, in his report on the activities of the year. He made a strong plea for the betterment of conditions which caused war in the midst of plenty.

Reports on a multitude of recreational and educational activities carried on by the club for the benefit of men, women and children were presented by chairmen of the committees concerned, and the general impression was left that the year despite difficulties, had been satisfactory.

FIGHTS BULL -AND DIES

John Morton, an elderly Belfast farmer, had a fight to the death with a bull—and lost. He fought it off with a stick. A woman came to his help—and fainted. A boy set a dog on the bull, which ran off—too late. John Morton died of his wounds. The bull was shot.

Distribution of Homes in Canada Outlined to Club

In the Dominion of Canada there are a total of 1,266,000 homes of which 431,000 are located in metropolitan or large city areas; 715,000 in urban centers that is smaller cities and towns, and the balance in farms or villages, according to statistics prepared for the purpose of arranging advertising, in order that the best results may be obtained, in the various periodicals.

These figures were revealed by Hugh Anderson, advertising manager of the Northwest Farmer in an address to members of the Advertising Club at their weekly luncheon in the Mount Royal Hotel today.

An interesting address on present day problems with particular reference to the question of what to do with the ever-increasing number of school graduates who are being thrown into a world in which there is no work for them to do was delivered by W. R. Cook, Y.M.C.A., before members of the Progress Club at their weekly luncheon in the Windsor Hotel yesterday.

Radio Programs CECF — Thursday

- 11:00—Solist.
- 11:15—Tony Wons.
- 11:30—U. S. Navy Band.
- 11:45—Morning News.
- 12:00—Fields and Hall.
- 12:30—Ladies on Parade.

Old Country Soccer Results

Bristol City 2, Portsmouth 0.
Manchester United 0, Notts Forest 3.
Leeds 1, Norwich City 2.
Everton 6, Sunderland 4, after playing additional time.

Regular league soccer resulted as follows:
ENGLISH LEAGUE DIV. I.
Tottenham Hotspur 1, Chelsea 3.
West Bromwich Albion 0, Arsenal 3.

DIV. II.
Bolton Wanderers 5, Notts County 1.

DIV. III, SOUTHERN SECTION
Luton Town 2, Crystal Palace 2.
Aldershot 3, Swindon Town 0.
Reading 8, Northampton 1.

SCOTTISH CUP DRAW.
Glasgow, Jan. 30.—(CP Cable).—The draw for the second round of the Scottish football cup competition, to be played on Feb. 9, was announced today. Rangers, 1934 cup holders, are drawn at home against Third Lanark. Buckie Thistle draw a bye.

THE DRAW:
Dundee United vs. Queen's Park.
Motherwell vs. Morton.
Ayr vs. King's Park.
Rangers vs. Third Lanark.
St. Mirren vs. Forfar Athletic.
Hearts vs. Kilmarnock.
Airdrieonians vs. Rosyth Amateurs.
Aberdeen vs. A'bon.

Brechin City vs. Bath Rangers.
St. Johnstone vs. Dumbarton.
St. James' vs. Hamilton Academicals.
Hibernians vs. Clachnacunn.
Celtic vs. Partick Thistle.

Spider Catcher Lucrative Trade

Hunts Hedges and Bushes To Find Threads For Scientists.

London.—There is a man in London who catches spiders for a living.

Not rare or dangerous spiders, but the common variety whose web can be seen on any hedge or bush. Armed with a satchel of empty match-boxes, he goes slowly down a country lane peering into hedges searching for the newly spun webs.

With uncanny skill the "spider-man" located his quarry under leaves or in clefts in bark.

The male spiders—he knew them it seemed, by name—were left severely alone. The females, with a deft movement, were dislodged and placed in the match-boxes.

Who buys the spiders?
Men who use the insects' threads for marking the diaphragm sight-lines on scientific instruments of precision.

The "meridian" at Greenwich, from which the greater part of the world takes its time, is a thread spun by a common spider.

The female spider is kept in captivity for three or four days. Then she is allowed to escape. Letting out her thread, she attempts to lower herself to the ground. As quickly as she spins a workman winds the thread, in single strands, on a delicate wire frame.

Spends Millions Beating Locusts

Eshowe, South Africa. — (CP).—Reporting the Union government had spent \$2,500,000 since June last in fighting the locust invasion of South Africa's farming districts, Dr. J. H. Viljoen, secretary for agriculture, faced a large meeting of farmers and planters here and declared the fight must and would go on.

Dr. Viljoen said success could only be reached by refraining from carping criticisms. This was a round-table conference to discuss "this terrible menace which affects the whole Union."

The Zululand farmer had had to bear the brunt of the invasion, but the whole of South Africa was very badly invaded. Soaking rains had added to the troubles in the hatching out of brown locusts. If it were not controlled it would threaten the whole country. They had succeeded in destroying all the red locusts in the land with the exception of the Protectorates. In spite of all the difficulties and the surprising habits of red locusts, they had protected the in and crops and had, for instance, a surplus of 6,000,000 bags of maize.

The department had experimented on a large scale with aeroplanes. They could do as much with one aeroplane in half an hour as could be done by 10 or 20 men in 10 days. He knew Zululand farmers were protesting against the aeroplanes and asking for their withdrawal. He had no details of stock losses, but presuming a few cattle had died, was it in their own interests to stop operation? He could not say whether the government would pay compensation, but if they could not use aeroplanes what was the alternative?

Dr. Viljoen could conceive of no better method of destroying locusts than by aerial spraying. They were expecting the swarms to go south and hoped they would fly into the sea. He asked farmers to assist the government in saving public money. He had been worried to death by the vast public expenditure, he told them.

He had come to the conclusion

that the whole system should immediately be reorganized. He had therefore decided that the present locust officers should continue their field work, but they could not be expected to control expenditure. It had been decided that from now on every magistrate would be responsible for his own district.

When the Baby Laughs —

YOU are being advertised to. When the sun shines, when the flowers bloom, when dinner sends out its inviting aroma — when any one of a thousand things happen to attract your attention, you are being advertised to.

The purpose of any advertisement is to attract your attention and arouse your desire; to tell you what is new and good; to guide you to something you ought to have; to make you happier and more comfortable; to save you money and make life easier for you.

So, read advertisements. They will give you the latest ideas and improvements. They will help you to live better and dress better at less cost.

You'll be surprised at the world of interest and the wealth of new ideas that you'll find in reading the advertisements in this paper.

Advertisements are daily records of progress. They are the reports to you of merchants and manufacturers who work for you, telling what has been accomplished for your benefit. Take advantage of them.

Don't let a day slip by without reading the advertisements.
